

Subject: Mathematics

Class: 5

Topic: Estimation and Rounding Off

Levels: Basic, Intermediate, Advanced

Level: Basic

1. Round off 42 to the nearest ten: ? _____
2. Arjun has ₹87. Round off this amount to the nearest ten: ? _____
3. Round off 155 to the nearest hundred: ? _____
4. Which number is closer to 80: 74 or 82? _____
5. Round off 1,240 to the nearest hundred: _____
6. If a book costs ₹243, its estimated cost to the nearest hundred is ? _____.
7. Round off the number of days in a year (365) to the nearest ten: _____
8. Is 450 rounded to the nearest hundred 400 or 500? ? _____
9. Round off 9,991 to the nearest ten: _____
10. Estimate the sum of $20 + 70$ by rounding each to the nearest ten: _____

Subject: Mathematics

Class: 5

Topic: Estimation and Rounding Off

Levels: Basic, Intermediate, Advanced

Level: Intermediate

1. Estimate the sum of $456 + 231$ by rounding to the nearest hundred: _____
2. Sita spent ₹5,670 on a phone. Round this to the nearest thousand: ₹ _____
3. Estimate the difference: $892 - 412$ (Round to nearest hundred): _____
4. A bag contains 2,455 marbles. Estimate to the nearest thousand: ? _____
5. Round off the product of 12×9 to the nearest ten: _____
6. Estimate the perimeter of a square with side 48 cm (Round side to nearest 10): _____
7. A train travels 1,289 km. Round this distance to the nearest hundred: _____
8. Estimate ₹88 + ₹44 by rounding to the nearest ten: ₹ _____
9. Which is a better estimate for 583: 580 or 600? ? _____
10. Round off 7,500 to the nearest thousand: _____

Subject: Mathematics

Class: 5

Topic: Estimation and Rounding Off

Levels: Basic, Intermediate, Advanced

Level: Advanced

1. Estimate the product of 48×102 by rounding each to the nearest ten: _____
2. If $? = 1,450$ and $? = 1,540$, which one rounds to 2,000 (nearest thousand)? _____
3. Estimate the quotient of $812 \div 19$ by rounding to nearest tens: _____
4. Rahul bought items for ₹2,345, ₹1,120, and ₹890. Estimate the total bill to the nearest 1000: _____
5. Round off $(45 + 55)^2$ to the nearest hundred: _____
6. Find the smallest number that rounds off to 500 when rounded to the nearest ten: _____
7. Estimate the area of a room 12m long and 9m wide (Round to nearest ten first): _____ m^2
8. A tank has 4,567L of water. If 1,234L is removed, estimate the remaining water to nearest 100: _____
9. ? Challenge: What is the largest number that rounds to 800 when rounded to nearest hundred? _____
10. Estimate the price of 9 chairs if one chair costs ₹995 (Round to nearest thousand): ₹ _____
